DETAILED ACTION

Allowable Subject Matter

Claims 28, 29, 52 and 54-58 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Independent claim 28: Dietz teaches playing and buffering real time voice data when a mobile phone is away (de-coupling) from a user's ear, and playing the buffered data (first voice data) while continue to buffer real time received voice data (second voice data). Dietz teaches a speed up playing until catches up with real time voice data. Dietz further teaches removing silence in received voice data. Dietz fails to teach jumping back to real time voice data while playing buffered voice data when a user speaks or requests a floor.

Independent claims 52 and 57: Harris teaches inserting missing voice data in a buffer and playing back all voice data, in a delay mode, automatically to a user in push-to-talk mode of wireless communications. Harris fails to teach playing voice data as received without the missing voice data, and in response to a user input, playing back all voice data including the inserted missing voice data.
